🧠 Skills

Technical Skills
HTML, CSS, JavaScript, React, NodeJS, MongoDB, ExpressJS, Redux, NextJS, Git/GitHub, ChakraUI, Flutter

Soft Skills
Collaboration, Communication, Problem-solving

📂 Projects

Activity-Tracker (Team project)

GitHub ↗ | **Deployed** ↗
Activity Tracker isn't just a time tracker. You can add projects and record attendance, and stay informed about remote workers all on one platform.

Features:
- JWT user authentication
- Task tracking & management using RESTful APIs
- Responsive for all screens

Areas of responsibility:
- Created responsive pages
- Integrated JWT-enabled authentication
- Added task tracking feature using Redux

This project was built by 4 members in a span of 5 days.

Tech Stack: React | ExpressJS | ChakraUI | MongoDB

TripBook (Team project)

GitHub ↗ | **Deployed** ↗
TripBook provides online hotel bookings of hotels in India and worldwide. Book cheap, budget, and luxury hotels at great prices on the best hotel booking site.

Features:
- JWT user authentication, private & dynamic routing
- Password hashing, server-side rendering
- Role-based access
- Responsive.

Areas of responsibility:
- Created landing page, developed user authentication using JWT
- Developed the APIs for the entire process of booking hotels.
- Added responsiveness for all screen sizes

This project was built by 4 members in a span of 5 days.

Tech Stack: Next.JS | ChakraUI | JWT | MongoDB
